

Mind Control Issue

Senate and Congress

Senate and Congress must take measures against mind control. Also they deserve to know they are mind controlled themselves by USA government Agencies. There is a need for a work group constantly pursuing the topic. See they mind control everyone on the planet but specially important and influential people. People who do mind control themselves are mind controlled also. All of our emotions and experience is a software. But what can we do? Some agencies in America are committing genocide by mind controlling locals. They destroy economies and harm families. It has nothing to do with Nation security when they mind control and rape family of a factory owner's daughter in China then subsequent event leads to weaker Chinese economy. America also commits preemptive Genocide in Red Sea and literally America conducts ethnic cleansing of Muslims in every corner for decades. Is America want to be remembered for these crimes? If not then you in Senate and Congress relentlessly pursue issue of mind control as president Trump must do so. Trump was made president to end mind control as some Messiah of sort. We were nice to him but mind control obstructed it. We need all branches of government openly discussing the issue and educate the public developing means defense and accountability.

Most important thing is accountability for mind control because it is so classified no one can question them and slowly a spy or an agent becomes too powerful thus controls senate and congress or even president himself. It is very horrible condition in America specially since bush which has expanded surveillance even monitoring mind control of individuals producing conflicts for individuals thus two mind control, one from surveillance state (part of it is mind control) and other mind control being classic ones. This leads to individual and civil war of ~~the~~ ^{mind control} among population of America.

Anyway we need briefing for SENATE and also CONGRESS where issue is boldly and openly discussed. The world mind control must be said often and straight answers shall be given. Things to know is 1- mind control is done by sending magnetic and electromagnetic waves to head (Brain). 2- It is preprogrammed and is a software so a software sequences the wave and guides are daily activity. 3- All of human population is mind controlled. 4- Since mind control is done by software which generates software data for mind control there is not much need for human input. Thus some 1 million people can mind control seven billion people. 5- Mind control and their software is racist and is anti Iran and anti Muslims and these people must be protected from hate mind control creates against Muslims and Iranians.

A classified Briefing is not enough we need senate and congress constantly working on the issue and we need protection against political assassination of representatives on this task.

This congress has been formulated to pursue issue of mind control to find a way to protect the population from it. There must be multiple sessions with mandatory repeat every 45 days for 20 years or until issue is solved. There are things such as making building rule and laws of construction to include shielded walls (copper) against mind control. There is possibility to cheaply build housing, schools, libraries, and specifically emergency shelters for people who are targeted abusively. There is also having radio frequency laws which would encompass full spectrum and sensors to confront mind control but ~~the~~ the issue is far past radio frequency policing and licensing. Anyway, make sure Supreme Court, White House, and house of representatives are all on the task. Be bold and open when mentioning

H. Remember they are so secretive and intelligence officers may not know much at all.
